

The DOS Games folder

This folder has been created by Boxer as a handy place to put your DOS games. Boxer will look here for games to play, and new games will be installed here. You can rename this folder or move it wherever you like—Boxer will still find it.

Check out the [Boxer website](#) for sample games, and tips on where to find more games to put in here. Feel free to throw away this document once you're done reading.
